AUTOKART ALL-INCLUSIVE OPTICAL SCAN STORAGE SOLUTION

The AutoKart is a compact, integrated solution for jurisdictions using precinct scanners in conjunction with the AutoMark®. When using the AutoKart, your voting equipment is consolidated into a mobile precinct.

Save time and money by using AutoKart!

AutoKart, Voted the precinct choice of your neighboring counties.

The AutoKart is a compact, integrated solution for jurisdictions using precinct scanners in conjunction with the AutoMark, your voting equipment is consolidated into a mobile precinct.

“ Cost savings realized by the purchase of the AutoKart system in certain applications essentially helped it pay for itself. ”

One end of the AutoKart holds the optical scanner and the other end holds the AutoMark[®]. The AutoMark[®] rests securely on the pullout shelf that allows full accessibility from a wheelchair. Since the AutoMark and the optical scanner with ballot box are located at opposite ends of the Kart, so that both ends may be used simultaneously in full privacy.

The ballot box, scanner and AutoMark[®] remain in the AutoKart during storage, deployment and the election process. Additional space is provided for storage of up to six suitcase style voting booths. A container is included for precinct supplies and forms.

The included nylon cover provides protection during transport and storage and has a clear pocket for precinct identification or other desired information.

All functions of all the devices are fully accessible including access to computer media, electrical cords and removal of ballots.
