

# The Sentio is Innovative, Effective, and Secure

The patent-pending Sentio Ballot Printing System™ provides election officials with the ability to accurately produce their own ballots – on demand – from large batches of absentee requests to individual ballots for early voting or counter ballots. This state-of-the-art solution is flexible, secure and cost-effective. Sentio can help counties print the correct ballot, on-demand, at voter locations with complete accuracy and a full audit trail.

**Capable of accurately and efficiently duplexing up to 19" ballot stock  
and dual simplexing up to 22" ballot stock**

## Why Choose Sentio?

- ◆ **Flexible.** Sentio is compatible with all voter registration systems.
- ◆ **Efficient.** Sentio automatically produces the exact quantity of ballots needed for each absentee run. This eliminates the need to store pre-printed ballots, as well as the time-consuming task of manually picking ballots.
- ◆ **Accurate.** Sentio improves quality by eliminating human error in picking and handling ballots.
- ◆ **Cost-Effective.** Sentio generates the exact quantities of ballots needed, which eliminates the waste that occurs with ordering absentees and duplicates in advance.
- ◆ **Secure.** Sentio's multi-layered security protects against unauthorized use. Once logged in, ballot generation is controlled and monitored. Reports are available showing every ballot produced by each user.
- ◆ **Verifiable.** Sentio reconciles print output against ballot requests. This provides a verifiable audit trail of all requested ballots printed while protecting against unauthorized ballot printing.
- ◆ **Easy-to-Use.** Sentio is specifically designed to be used by non-technical operators. This simplifies training and allows it to be an effective solution for remote offices or early voting sites.

## Enhanced Software

The Sentio now comes with Runbeck's enhanced software that has been optimized for faster performance. Based on extensive testing and in-field usability data, the new software significantly reduces print time over the previous version. The updated software also includes features suggested by customers, such as consolidated tabs and an improved "what you see is what you get" (WYSIWYG) user interface.

## Multiple Configurations Creates Flexible Pricing Options

Sentio Ballot Printing System provides customers with numerous possibilities that create flexible pricing options. Multiple form factors and "a la carte" add-on features mean customers can purchase exactly what they need.
